Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a tag management server for providing tag management information, classified in class 707, subclass 200.
- II. Claims 3-7, drawn to an information acquiring/utilizing system which includes a portable terminal for reading tag information and a tag management server, classified in class 705, subclass 23.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are as follows: (1) a tag management server for providing tag management information; and (2) an information acquiring/utilizing system which includes a tag management server and a portable terminal for reading tag information. Group I is claiming a tag management server, whereas Group II is claiming a system that includes a device that reads tag information or barcode information, a tag management sever and an item management server. The search required for Group II would not be required for Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Juan Carlos A. Marquez (registration no. 34,072) on May 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
